TITLE : WASHING OF FILTER MEMBRANE
MODULE

ABSTRACT : PURPOSE: To simply wash a filter membrane module clogged by the adhesion of a non-transmitted substance by a specific chemical agent.

CONSTITUTION: In the washing of a filter membrane module in a surface flow water purifying system, the filter membrane module is immersed in an NaClO soln. with concn. of 5-95mg/l and the product of the concn. and the immersion time is $1 \times 10^{-7} \times 10$ (mg/ l).h. When the water purifying systgem consists of two or more filter membrane modules, while at least one filter membrane module is used, the other filter membrane module can be washed in the state fitted to the water treatment system.
